

RANDEEP PULIKKAPARAMBIL RAGHUNATHAN

Data Engineer

✉ togetran@gmail.com | ☎ +46 734922316 | 🔗 LinkedIn | Portfolio | 📍 Stockholm, 14156

Professional Summary

Data Engineer with 4+ years of experience in Microsoft BI Stack (Power BI, SSIS, SSRS, SSAS), SQL development, ETL processes, data modelling, and data warehouse design. Strong analytical mindset with the ability to translate business requirements into scalable data solutions. Experienced working in multicultural environments with excellent communication and collaboration skills.

Key IT Skills

- Database & Scripting: SQL, PL/SQL, Shell Scripting (Linux)
- Data Migration: Legacy System Consolidation, Data Integration, ETL (SSIS)
- Compliance & Reporting: Regulatory Data Management, Audit Reporting
- Development Tools: SQL Server, Oracle, SSMS, Azure SQL
- Environment: Linux / Windows Servers
- Methodologies: Agile, Scrum, Continuous Integration

Work Experience

Aug-2022 - Aug-2024

Data Analyst & Assistant Professor

Holy grace Academy of Engineering, Mala, India

Roles and Responsibilities:

- Collected, analyzed, and visualized institutional data using SQL and Power BI to support data-driven decision-making.
- Designed dashboards and reports to monitor student performance and KPIs, improving academic tracking efficiency by 25%.
- Collaborated with faculty to prepare analytical reports for accreditation and planning.
- Taught Database Management Systems and Software Testing, integrating real-world data analysis into coursework.

Dec-2017 - Jan-2022

Software Engineer

Facts Computer Software House, Dubai, UAE

Roles and Responsibilities:

- Developed and optimized SQL and PL/SQL stored procedures and triggers to support multi-module ERP operations.
- Consolidated and migrated legacy data systems, reducing redundancy and improving data accessibility.
- Automated data workflows and report generation through SQL scripting and process optimization.
- Supported data compliance and audit processes by ensuring accuracy and traceability across financial transactions.
- Collaborated with business users and IT teams in an agile environment to deliver stable, high-performance solutions.

Major Projects

Project: ARMotors Luxury Car Service ERP

Role: Full-Stack Developer (C#.NET / MS SQL)

- Designed and implemented an end-to-end ERP system for a luxury car service center, handling service booking, diagnostics, and inventory management.
- Developed stored procedures and reports for operational visibility and profitability tracking.
- Integrated supplier systems for automated parts ordering and ensured data integrity through optimized SQL operations.

Project: Shokri Hassan Trading LLC – Fruits & Vegetable Trading ERP

Role: SQL Developer / Data Integration Specialist

- Developed and optimized **stored procedures** for order processing, inventory management, and reporting.
- Corrected and debugged errors in ERP workflows to improve system reliability and performance.
- Designed and maintained **Crystal Reports** for sales, stock, and financial analysis.
- Integrated and processed data from external sources, including **Carrefour order portal**, ensuring accurate and timely order management.
- Collaborated with business teams to understand requirements and implement data-driven solutions.
- Ensured **data consistency and accuracy** across multiple systems, enhancing decision-making capabilities.

Project: Roofings Middle East – Steel Fabrication & Cladding ERP Support

Role: ERP Support Specialist / SQL Developer

- Developed and optimized **stored procedures** for inventory management and production workflows.
- Conducted **stock audits** and reconciliations to ensure data accuracy and operational efficiency.
- Assisted in the preparation of **Bill of Materials (BOM)** forms, streamlining production planning and procurement processes.
- Collaborated with cross-functional teams to identify and resolve ERP-related issues, enhancing system reliability.
- Provided ongoing **ERP support and troubleshooting**, ensuring minimal downtime and continuous improvement.

Project: Al Jabali Jordan – Data Warehousing and Business Intelligence

Role: Data Warehouse Developer / SQL Developer

- Designed and implemented a data warehouse to consolidate data from multiple systems, improving reporting efficiency.
- Developed ETL processes using MS SQL Server to integrate data into analytical models.
- Created star schema-based models and optimized stored procedures for analytics and dashboards.

Education

- Masters in Microdata Analysis (Business Intelligence) – Dalarna University, Sweden (2024 - 2025)
- M.Eng. in Computer Science (Software Engineering) – Anna University, India (2014–2016)

Certifications

- IBM Certification – Introduction to Data Engineering

Languages

- English (Fluent) | Swedish (Beginner, Learning)
